# Bilal Siddique

## Objective

A skilled fresh graduate software engineer adept at developing and deploying Python-based web applications using Django and Flask frameworks. Passionate about emerging technologies such as cloud and data engineering. Specialized in front-end and back-end development, with expertise in React. is, Next. is, Diango, Tailwind CSS, Docker, Kubernetes, and more.

#### Education

#### NED University of Engineering and Technology, Karachi, Pakistan (UIT)

10/2019 - 07/2023

Bachelors Of Science, Software Engineering, Major Computer Science

GPA: 4/3.01

Coursework: Cloud Computing, Data Structures & Algorithms, Object Oriented Programming, Data

Encryption & Security, Fundamentals Of Data Mining

Technical Skills

Languages: Python, TypeScript, JavaScript

Web Technologies: React.js, Redux, Next.js, Tailwind CSS

Frameworks: Flask, Node.js, Django, Next.js Databases: MongoDB, SQL (Oracle Database)

Version Control: Git, Github

Deployment & Cloud: Docker, Kubernetes Software & Tools: Postman, VSCode, Firebase

Experience

### Freelance Full-Stack Engineer

Remote

Fiverr-Upwork01/2023 - Present

 Collaborated with clients worldwide, delivering exceptional results through web development services. • Developed dynamic and static websites using technologies such as React.js, Next.js, and Tailwind CSS.

## Assistant Python Lecturer

Karachi, Pakistan 01/2023 - 07/2023

01/2021 - 06/2021

Usman Institute of Technology, Karachi

 Assisted lead Python lecturer in preparing and delivering engaging lectures. • Conducted tutorial sessions to provide additional support on Python programming concepts.

Software Engineer Intern (Front-end)

Remote

RadicalX, New York Collaborated in interdisciplinary team for front-end and back-end development.

- Contributed to creation of user stories, breaking them down into engineering tickets.
- Developed a dashboard for creating, updating, and deleting apprenticeship programs.
- Utilized tech stack including JavaScript, React.JS, Redux Toolkit, Node JS, Firebase, and Tailwind CSS.

#### **Projects**

### Student Project Allocation System | Python, Django, Bootstrap5, PostgreSQL Git Live

01/2021 - 02/2021

- Developed a Student Project Allocation System module as a semester Project.
- Designed and implemented a Python Django project enabling student and project management. Empowered users to effortlessly add, edit, and assign projects to students, while providing visibility into assigned projects.

FYP - Co-reference Resolution in Urdu Language | Python, Django, Bootstrap, XLM-Roberta Model 06/2022 - 08/2023

- Developed using XLM-Roberta NLP model to classify entities in low-resource language like Urdu.
- Co-reference resolution is to find and group all mentions referring to the same entity.
- It was a research based project where we were using Transformers based model.

Consumer Complaints Data Pipeline and Visualization Project | Python, Airflow, MySQL Git - 08/2023 - Present

- Crafted an end-to-end ETL solution in Airflow for Consumer Financial Protection Bureau complaint data, meeting internal stakeholders' need for up-to-date monitoring.
- Extracted, transformed, and loaded data into MySQL, currently developing a Streamlit dashboard for dynamic visualization to enhance decision-making.

Scrap Flights Data - Sastaticket.pk — Gozayaan.com | Python, Beautiful-Soap, requests Git -08/2023 - 08/2023

• Created scrapers for Gozayaan and Sasta-ticket to extract flight data as per requirements and stored it in CSV format.

#### Certifications

Certificate 1: Certified Cloud Data Engineer - Karachi AI (In progress)

Certificate 2: Intermediate Python - DataCamp DataCamp

Certificate 3: Web Scraping in Python DataCamp

Certificate 4: Data Manipulation with pandas DataCamp

Certificate 5: Front-End Development - From Facebook(Meta) Coursera

Certificate 6: Programming with JavaScript - From Facebook(Meta) Coursera

Certificate 7: Version Control(Git and GitHub) - From Facebook(Meta) Coursera

Certificate 8: React Basics - From Facebook(Meta) - From Facebook(Meta) Coursera

Certificate 9: Advance React - From Facebook(Meta) Coursera
